**How are the Tax Levy and Tax Rate determined?**

Taxes are expressed in dollars per thousand dollars of assessed value. The assessments used for the 2012-2013 fiscal year are as of 12/31/2011.

Tax levies and rates for FY 2012-2013 presented here are estimates based on the budget as recommended by the Budget Committee and the assessed value of all taxable property; motor vehicles and real estate & tangible personal property.

The total tax levy is a function of expenses, revenues received from sources other than local taxation (e.g., state funds, license & permit fees, etc.) and anticipated uncollectable taxes. Recommended expenditures are reduced by the estimate of revenue from other sources to determine the amount of taxation required to support expenditures. Required taxation plus anticipated uncollectable taxes (abatements) equals the amount to be raised by local taxation, the total tax levy which is subject to the State tax cap law.

The motor vehicle tax levy is a function of the assessed value of all motor vehicles and a fixed tax rate of \$19.14 per \$1,000 of value. The first \$6,000 of value for all taxable motor vehicles is exempt from taxation. The total taxable value of all motor vehicles multiplied by the fixed tax rate of \$19.14 equals the motor vehicle tax levy.

The real & tangible property (real property) tax rate applies to real estate and tangible personal property (business fixtures) and is a function of the total levy, the motor vehicle levy and the total assessed value of all taxable real property. The total levy reduced by the motor vehicle levy leaves a balance to be raised by the real property tax levy. The real property levy divided by the total town real property value (in thousands) equals the real property tax rate.
